

Clarification of Club Rules Regarding Acceptable Targets

We had some recent instances of members using their own target frames, supports or hangers at the range.

The purpose of this communication is to help clarify the club rules and clear up misunderstandings about what targets are acceptable.

Acceptable	Not Allowed
<ul style="list-style-type: none">• Your own paper or cardboard targets, attached to club backboards• Club-provided reactive targets at the pistol ranges• Club-provided steel targets at the 600/300/200-yard range	<ul style="list-style-type: none">• Your own free-standing target frames or hangers• Your own reactive/self-healing targets• Any other non-paper targets, bottles, jugs, etc• Anything not attached to the club backboards

Note that there are 3 specific short-range target frames provided at the 25-yd pistol range and members may choose various distances to shoot from forward of the normal firing line under the "red light" rule.

Safety rules 5-7 are included for reference:

5. The only permitted targets are paper mounted on the proper frames or GGC supplied permanent targets. Targets shall be placed in a manner in which no damage is done to the target frames. Shooting at anything other than an approved target is a safety infraction. Other targets require Board approval.

6. Metal targets may be used only in scheduled practice and matches for each discipline and in a manner approved by the director of that discipline.

7. Shooting at anything besides your properly posted target is a safety infraction and is not allowed.

As noted in Rule 5, use of other targets may be requested but require approval from the Board. **You do not have permission for any rule variance unless you have a signed document from the Board granting specific permission.**

Respectfully,
Joe Taylor
Safety Director
